01 | Service-Based Companies

Entry-level software and IT hiring - essential DSA only

Target interview difficulty: Mostly Easy; role and hiring track may be harder

COMPANIES

TCS, Infosys, Wipro, Accenture, Cognizant, HCLTech, Capgemini, Tech Mahindra, LTIMindtree, DXC Technology, CGI, Zensar

DSA TOPICS

Core: Time and space complexity (Big-O), basic mathematics, number problems, patterns, recursion basics.

Arrays & strings: Traversal, min/max, reverse, frequency counting, duplicates, palindrome, anagram, basic subarray questions.

Searching & sorting: Linear search, binary search, bubble sort, selection sort, insertion sort; know basic complexity.

Data structures: Hash maps/sets, linked list basics, stack and queue basics.

INTERVIEW PREPARATION

• Practice easy coding problems first; build speed and accuracy for timed tests.

• Explain your logic, edge cases, and time/space complexity in simple English.

• Prepare common coding patterns: prime number, factorial, Fibonacci, reverse string/array, second-largest, frequency count, palindrome.

Note: A concise preparation guide based on your uploaded PDFs. These are suggested study priorities, not guaranteed company-specific questions.
